
EUROCONTROL and FREQUENTIS extend long-term contract for air traffic surveillance solution

- **EUROCONTROL and Frequentis Comsoft have extended their industrial partner contract for modern air traffic management with the ARTAS tracker**
- **ARTAS provides high-performance tracking as well as surveillance and flight data processing capabilities**
- **Frequentis Comsoft has been EUROCONTROL's industrial partner since 2001**

Frequentis Comsoft has been awarded a two-year industrial partner contract extension, continuing their long-standing relationship with EUROCONTROL. The renewed contract ensures continuous support and upgrades for ARTAS (ATM surveillance tracker and server) to meet evolving demands.

The CAMOS contract (Centralised ARTAS Maintenance and Operational Support – Industrial Partner) involves the maintenance and operational support for the ARTAS system. ARTAS is the most widely deployed tracker in Europe and is recognised as one of the most advanced and mature surveillance data processing systems worldwide.

“ARTAS is critical for ensuring the reliability, efficiency, and safety of air traffic management systems across Europe. The contract renewal reflects EUROCONTROL's confidence in Frequentis Comsoft's expertise and its commitment to supporting our ARTAS roadmap and advancing the ARTAS tracker,” says Antonio Principe, EUROCONTROL ARTAS and SDDS Services Manager.

Developed by EUROCONTROL on behalf of their member states, ARTAS employs the latest multi-sensor tracking technology to deliver exceptional accuracy and reliability using PSR, SSR, Mode-S, ADS-B, and multilateration surveillance sources. The system supports around 90% of daily flight movements in Europe and is deployed at approximately 100 locations.

"We are honoured to be entrusted once again by EUROCONTROL for the CAMOS project," says Constantin von Reden, Frequentis Comsoft Managing Director, and Member of the Frequentis OneATM Executive Team. "This contract renewal highlights the strength of our partnership and our shared dedication to enhancing the safety and efficiency of air traffic management in Europe. Our team is committed to delivering the highest standards of support and innovation to ensure the continued success of the ARTAS system."

About FREQUENTIS

Frequentis is a global supplier of communication and information systems for control centres with safety-critical tasks. The listed family company develops and markets its “control centre solutions” in the Air Traffic Management segment (civil and military air traffic control, air defence) and the Public Safety & Transport segment (police, fire brigades, emergency rescue services, railways, coastguards, port authorities). With a market share of 30%, Frequentis is the world market leader in voice communication systems for air traffic control. Frequentis is also the global leader in aeronautical information management and aeronautical message handling systems.

As a global player with around 2,200 employees (full-time equivalents/FTE), Frequentis has a global network of companies and representatives in more than 50 countries. Its head office is in Vienna, Austria. Frequentis' products, services, and solutions are used at more than 49,000 operator working positions in around 150 countries. Shares in Frequentis are traded on the Vienna and Frankfurt stock exchanges; ISIN: ATFREQUENT09, WKN: A2PHG5. In 2023, revenues were EUR 427.5 million and EBIT was EUR 26.6 million.

Wherever Frequentis' systems are used, safety-critical operators bear responsibility for the safety of other people and goods. The company also works towards a more sustainable future through its air traffic optimisation solutions.

About FREQUENTIS Comsoft

In 2016, Frequentis Comsoft joined the Frequentis Group as its competence centre for AMHS, AIM, surveillance technologies, and ATM systems. Frequentis Comsoft provides software-centric solutions covering a major part of the surveillance data chain: from distribution to processing to display.
