
UAE advances AIM technology with latest FREQUENTIS upgrade

- **The UAE's General Civil Aviation Authority (GCAA) is undergoing a major upgrade to its aeronautical information management (AIM) system to meet future global requirements and maintain its high service standards.**
- **Frequentis continues its collaboration with GCAA to drive innovation in AIM technology.**

The General Civil Aviation Authority (GCAA) of the United Arab Emirates (UAE) has reinforced its leadership in aviation innovation by upgrading its integrated AIM system with advanced features. This upgrade, following a competitive request for proposal, incorporates state-of-the-art capabilities that meet evolving global aviation standards and align with the International Civil Aviation Organisation (ICAO) roadmap.

The GCAA recorded a significant increase in flight movements in 2024 compared to the previous years, reflecting its important role in global air traffic management (ATM). "Centralised data management is key to modern aviation safety, sustainability and efficiency. With this upgrade, we are not only meeting global standards but also preparing for the future of AIM by implementing the global AIM roadmap requirements ahead of time. This system will help us manage the growing demand for digital aeronautical information. It supports the expanding aviation infrastructure in the UAE and strengthens the country's position as a global aviation hub," says Ahmed Al Jallaf, Assistant Director General – Air Navigation Services at GCAA.

The upgraded system introduces advanced features to enhance efficiency and interoperability, while preparing for future aviation challenges. It supports the creation of ICAO-compliant data products for precise global distribution, while digital notices to airmen (NOTAM) will provide real-time updates for pilots or airport operators to improve operational efficiency. The upgraded system-wide information management (SWIM) portal ensures seamless data sharing among aviation stakeholders, and integrated workflow management streamlines processes through automation.

"The GCAA is committed to delivering world-class air navigation services while maintaining the highest standards of aviation safety and efficiency. We are proud to continue our collaboration on this next phase of innovation, supporting their progress in advancing AIM technology and airspace management," says Constantin von Reden, Managing Director of Frequentis Comsoft.

About FREQUENTIS Comsoft

In 2016, Frequentis Comsoft joined the Frequentis Group as its competence centre for AMHS, AIM, surveillance technologies, and ATM systems. Frequentis Comsoft provides software-centric solutions covering a major part of the surveillance data chain: from distribution to processing to display.

About FREQUENTIS

Frequentis stands for a safer world. Our solutions are used in our customers' command and control centres and help them make the world safer.

Frequentis' reliable communication and information systems are used around the world by civil and military air traffic control organisations (Air Traffic Management segment) and the police, emergency rescue services, fire brigades, railways, coastguards, and port authorities (Public Safety & Transport segment).

The listed family business based in Vienna, Austria, drives innovative and sustainable solutions for safety and security in everyday life and communications in the safety-critical sector. Its air traffic optimisation solutions for air traffic control centres contribute to reducing emissions.

With a market share of 30%, this high-tech company is the world market leader in voice communication systems for civil air traffic control.

As a global player with more than 2,300 employees (full-time equivalents/FTE), Frequentis has a worldwide network of companies in over 50 countries. Its products, services, and solutions are used in around 150 countries. Shares in Frequentis are traded on the Vienna and Frankfurt stock exchanges; ISIN: ATFREQUENT09, WKN: A2PHG5. In 2023, revenues were EUR 427.5 million and EBIT was EUR 26.6 million.
